

SOCKET2ME \ SMART PLUG \

Take control of your lighting and other plug-in appliances with a tap on your smart device. Using a smartphone app and WiFi connection, the Socket2Me can turn the lights on when you're away or unable to reach the switch. Schedule tasks in advance to help simplify your life or help manage energy usage at home or the office. With a full-color digital imprint on its face to display your brand, home automation has never looked so good.
